

METAGLAS® - Glass Lined Metaglas Sightglass
Type 275

Date: January

2006

For:

- Glass lined vessels
- Sightglass fittings to DIN 28121
- Through flow sightglasses to DIN 3236, 3237

Advantages

Glass lined Metaglas sight glasses combine the security of failsafe fused glass with the excellent characteristics of a glass surface.

Advantages of Glass lining:

- The product will only come into contact with polished glass
- Highly resistant to corrosive processes
- Inert surface so cannot adversely affect product purity
- No catalyst effect and no infection
- Resists build up of sticky products which gives:
- Better heat transfer & higher productivity

Safety

- Leaktight with very high pressure resistance
- High safety factor
- Shatterproof with reliability against total failure. The possibility of unexpected rupture is excluded.
- High resistance to bending and overtightening offers simple, fast installation with no risk of breakage.
- Remains leak tight even when glass is damaged.

Technical data:

Manufactured and Tested to:

- Directive for pressure equipment 97/23/EC Modul H/H1 (DIN/EN/ISO 9001)
- AD2000 Standards W0/TRD 100
- Sight glass fused to metal similar to DIN 7079
- Materials to VdTÜV-specifications and the DIN/EN designated standard

Ring material:

- P 265 GH (1.0425) EN 10028-2
- Sight Glass: B270
- Enamel DD 3009 blue or white

Approvals:

- TÜV-Approval in accordance with governing standards (for pressure vessels)

Operating Temperature: -60°C to 250°C

Size		Operating pressure
